This action has been a long time coming as the problems have been building over a number of years and we believe we are at crisis point.

How to grow strong teeth and keep new teeth healthy

Healthy foods keep you and your teeth healthy too.

Proteins and vitamins are used to build the inside part of teeth (dentine), and calcium and other minerals make the outer layer (enamel) super-hard and shiny white.

Milk Matters

Milk has lots of Calcium and other nutrients to help build strong healthy teeth.

Delicious Dairy

Have 2-3 serves of dairy each day to help get the Calcium you need

Acid Attack

Sweet and sour foods can harm your enamel if eaten often – stick to plain reduced fat milk and water most of the time
